Editorial Index 1968

Index to editorial articles appearing in Iron Age Metalworking International during the year 1968

Automation
Automated Plant Anodises Aluminium Extrusions, Sept p 36
Automated Press Line, Mar p 46
Computer Control System Regulates Foundry Production, May p 30
Computerised Cold Mill, July p 37
Electronically Controlled Dividing, June p 41
Feed Rate Control System Automates Sinter Plant, July p 36
Industrial Robots Find Jobs in Metalworking Plants, May p 32
Simple Measurements Aid Adaptive Control Progress, May p 40

Casting
Centrifugally Cast Pipes, Oct p 43
Continuous Billet Casting, Aug p 39
Diecasting Stainless Steel, June p 46
Improved Alloy Castings, June p 37
Quality of Castings Ensured by Fluorescent Inspection, Sept p 34

Ceramics
Freezing Ceramics, Jan p 43

Cold Extrusion
Cold Extrusion Makes New Impact, Apr p 27

Cold Forming
Forming Press Uses N/C, Jan p 46
Gears Turn Toward the Future, July p 27
Giant Stretch Former Has Rotating Jaws, Jan p 45
High-Pressure Tooling Controls Metal Ductility, Mar p 40
One Gear Rolling Unit Replaces Seven Hobbing Machines, June p 36
Spiral Forming Makes Tubes, Nov p 40

Cryogenics
Cryogenic Quenching Reduces Metal Distortion, July p 32

Drawing
New Approach Uses One Bench to Draw Tubes and Bars, Feb p 36
Ultrasonic Tube Drawing, Feb p 37

Extrusions, Hot
Automated Plant Anodises Aluminium Extrusions, Sept p 36

Fabricating
Adhesive Bonding Fills Gaps In Metalworking, Nov p 27
Aluminium—Steel Joints, June p 43
Continuous Forming Process Makes Large-Diameter Pipes, Sept p 42
Creep Forming Titanium, Dec p 45
Recent Advances Increase Use of Prefinished Metals, Feb p 25
Spiral Forming Makes Tubes, Nov p 40
Tubular Parts From Strip, Apr p 39
Underwater Metal Fabrication: A Challenge to Metalworking, Aug p 36
Unique Forging and Transfer Line Makes Universal Joint Shafts, Mar p 44

Fasteners
Fasteners Cleaned Faster, Nov p 33
New Self-Retaining Bolt, Mar p 33
Weld Fastening Oblong Studs, Sept p 31

Flame Cutting
Flame Cutting Titanium Parts, May p 35
N/C Directs Flame Cutter, Aug p 45

Forging
Productivity Increased by Simultaneous Forging of Parts, Dec p 42
Unique Forging and Transfer Line Makes Universal Joint Shafts, Mar p 44

Foundry
Composite Design: Is it Practical? May p 31
Compter Control System Regulates Foundry Production, May p 30
Foundry Melting: Cupola vs Induction vs Arc, May p 26
Hot Briquetting Uses Low-Cost Charge Material, May p 28
Improving Product Quality Leads to Foundry Savings, May p 30
Molybdenum Mould Liners Have a Longer Life, May p 29
Preheater Boosts Cupola Output, Dec p 46

Heat Treating
Coating Strengthens Alloys, Sept p 33
Cryogenic Quenching Reduces Metal Distortion, July p 32
Fast Stress Relief of Metals Accomplished by Vibration, Apr p 44
Faster Titanium Nitriding, July p 31
Gears Turn Toward the Future, July p 27
Induction Heating: Key to Slab Casting System, Feb p 40
Metal Surface Affects Many Heat Treating Operations, May p 38
New Approach to Batch Annealing Reduces Processing Time, Feb p 34
New Combination Process Hardens, Straightens Shafts, Apr p 42
Split-Furnace Annealing, May p 44
Titanium Carbide Toolin, July p 33

Hot Forming
Creep Forming Titanium, Dec p 45
New Tubemaking Technique Processes Continuously Cast Steel, Jan p 39
Unique Forging and Transfer Line Makes Universal Joint Shafts, Mar p 44

Hydraulics
Gauging With a Fluidic System, Aug p 31
Use of Hydraulic Systems Expands in Metalworking, Aug p 27

Inspection
Gauging With a Fluidic System, Aug p 31
Magnetic Bar Testing, Feb p 44
Metal Fractures Under Study with Electron Microscope, July p 38
Optics Scan Surfaces, Nov p 37
Piezoelectric Crystals Power Portable Field X-Ray Units, Oct p 42
Quality of Castings Ensured by Fluorescent Inspection, Sept p 34
Uncover Pipe Weld Defects, Sept p 35

Joining
Adhesive Bonding Fills Gaps In Metalworking, Nov p 27
Aluminium—Steel Joints, June p 43

Lubrication
The Silent Work of Cutting Fluids, July p 44

Machine Tools
Advanced Computer System Can Link N/C Machine Tools, Feb p 30
Fast Facet Grinding, Sept p 43
Fluid Bearings Technology Uncovers More Applications, Nov p 30
Heavy Machining Load Centers Increase Work Productivity, June p 34
Tape Library Speeds Up Parts, Apr p 31

Machining
2 Tables Reduce idle Time, Feb p 33
Automatic Tool Changers: One Way To Reduce Idle Time, Dec p 33
Controlled-Force Grinding, Nov p 44
Device Assures Milling Accuracy, Jan p 44
Diamond Grinding Hints, Oct p 36
Diamond Tools Hold Great Promise For Production Applications, Mar p 27
ECM Has Become Easier to Apply With New Machinability Data, Feb p 42
Electrochemical Machining Speeds Deburring Process, Aug p 40
Electronically Controlled Dividing, June p 41
Fast Facet Grinding, Sept p 43
Forgings Machined Economically in West German Steel Plant, Sept p 38
Forming Press Uses N/C, Jan p 46
Gears Turn Toward the Future, July p 27
Giant N/C Boring Mill, May p 41
Heavy Machining Load Centers Increase Work Productivity, June p 34
High-Speed Grinding: A New Trend in Abrasive Machining, Oct p 38
Linked Copying Lathe Line Offers Machining Flexibility, Apr p 40
Low Cost Digital N/C, Feb p 43
New Adaptive Control Unit, Oct p 34
New Cutter Ends Chatter, Jan p 46
New Techniques Aid Machining of Blades in Transfer Line, May p 36
N/C Drilling Machine on Rails Solves Complex Problem, Aug p 38
N/C Speeds Section Drilling, Aug p 46
Programming Becomes Faster With Direct Numerical Control, Sept p 32
Silent Work of Cutting Fluids, July p 44
Simple Measurements Aid Adaptive Control Progress, May p 40
Software: Translating Machine Requirements Into Tape, Dec p 37
Temperature: A Possible Key to Machinability, Jan p 40
Titanium Carbide Tooling, July p 33
Tough Grey Cast Iron Improves Machinability, Nov p 36
Turning: A Shift in Emphasis to N/C Lathes, Dec p 35
Two-Lathe Machining, Apr p 33
Ultrasound Used in Machining, Apr p 46
Unique Forging and Transfer Line Makes Universal Joint Shafts, Mar p 44
Unusual Strength, Hardness Characterise New Carbide, Nov p 32
Versatile Machining Concept Permits Simplicity, Flexibility, July p 40

Management
Bonus For Maintenance Jobs, Aug p 42
Diversification Develops in The Laboratory, Oct p 45
EDP Controls Inventories, July p 35
How to Manage Maintenance, Dec p 20
Human Side of Mergers, Sept p 44
Network Planning: A New Tool for Management, July p 42
Steel Firm Sells "Materials," Not Necessarily Steel, Nov p 46
Vibration Studies Reduce Costs, Oct p 41

Materials Handling
Industrial Robots Find Jobs in Metalworking Plants, May p 32
N/C Hoists Add Flexibility to Automatic Plating, June p 44

Materials
Boron Finds New Market, June p 33
Fibre Composites Cut Weight, Nov p 41
Titanium Carbide Tooling, July p 33
Tough Grey Cast Iron Improves Machinability, Nov p 36
Unusual Strength, Hardness Characterise New Carbide, Nov p 32
Fasteners Cleaned Faster, Nov p 33

Metal Finishing
Automated Plant Anodises Aluminium Extrusions, Sept p 36
Coating Strengthens Alloys, Sept p 33
Diffusion Coatings Fight Fatigue, Oct p 37
Edge Coating for Steel, Mar p 37
Faster Titanium Nitriding, July p 31
Electrocoating Process Moves Into Production Work, June p 38
Hydrochloric Acid Recovered From Horizontal Pickling Line, Apr p 34
N/C Hoists Add Flexibility to Automatic Plating, June p 44
New Hardfacing Technique Triples Production, Jan p 42
New Process Diffuses Alloys Into Metal, Alloy Surfaces, Apr p 32
New Zinc Anodising Process, Oct p 33
Novel Tube Finishing Process Improves Tolerances, Finish, Mar p 38
Plastic Balls Cut Heat Loss, Feb p 39
Quality, Economy Key Factors in Aluminium Coatings Search, Nov p 34
Recent Advances Increase Use of Prefinished Metals, Feb p 25
TFE Survives Abrasion, Mar p 43

Metallurgy
Diffusion Coatings Fight Fatigue, Oct p 37
Fast Stress Relief of Metals Accomplished by Vibration, Apr p 44
Flame-Hardened Plate Mill Rolls Give Longer Service Life, Nov p 38
Metal Fractures Under Study with Electron Microscope, July p 38
Metals Give Advance Notice Of Their Intention to Fail, Aug p 32
New Process Diffuses Alloys Into Metal, Alloy Surfaces, Apr p 32
Tough Grey Cast Iron Improves Machinability, Nov p 36
Vacuum Becomes Part of Stainless Steelmaking, May p 42
Vertical Furnace Continuously Remelts Copper Cathodes, Mar p 36
Why do Tool Steels Fail?, Dec p 40

Nonferrous Metals
Aluminium Production Process Employs Oxygen for Melting, Nov p 42

Numerical Control
Advanced Computer System Can Link N/C Machine Tools, Feb p 30
Automatic Tool Changers: One Way To Reduce Idle Time, Dec p 33
Giant N/C Boring Mill, May p 41
Forming Press Uses N/C, Jan p 46
Low Cost Digital N/C, Feb p 43
N/C Directs Flame Cutter, Aug p 45
N/C Drilling Machine on Rails Solves Complex Problem, Aug p 38
N/C Speeds Section Drilling, Aug p 46
N/C Hoists Add Flexibility to Automatic Plating, June p 44
New Adaptive Control Unit, Oct p 34
Programming Becomes Faster With Direct Numerical Control, Sept p 32
Software: Translating Machine Requirements Into Tape, Dec p 37
Tape Library Speeds Up Parts, Apr p 31
Turning: A Shift in Emphasis to N/C Lathes, Dec p 35
Versatile Machining Concept Permits Simplicity, Flexibility, July p 40

Plastics
Flexible Plated Plastic, Jan p 33
Plastic Balls Cut Heat Loss, Feb p 39
Recent Advances Increase Use of Prefinished Metals, Feb p 25
TFE Survives Abrasion, Mar p 43

Pollution Control
Management Looks At Air, Water Pollution Control, Oct p 27
Steel, Aluminium Mills Adopt Coolant Filtration Systems, Mar p 42

Powder Metallurgy
Superfine Powder Metal Filters, Feb p 29
Wire Reinforces Powder, June p 45

Power Transmission
Fluid Bearings Technology Uncovers More Applications, Nov p 30
Power Conversion Unit, Dec p 43

Presswork
Automated Press Line, Mar p 46
Forming Press Uses N/C, Jan p 46
Giant Stretch Former Has Rotating Jaws, Jan p 45
Quick, Safe Straightening, June p 31
Sixteen Different Stampings Can be Processed by New Press, Apr p 38

Steelmaking
Abrasive Descales With Vacuum, Dec p 41
Centrifugally Cast Pipes, Oct p 43
Computerized Cold Mill, July p 37
Continuous Casting Plant Makes Slabs of Varying Width, Apr p 36
Continuous Forming Process Makes Large-Diameter Pipes, Sept p 42
Continuous Rod Making Mill Uses Stretch-Rolling Concept, Aug p 34
Electroslag Casting Produces Stainless Steel Continuously, Mar p 32
Era of The Slab Caster, June p 27
Feed Rate Control System Automates Sinter Plant, July p 36
Flame-Hardened Plate Mill Rolls Give Longer Service Life, Nov p 38
Hydrochloric Acid Recovered From Horizontal Pickling Line, Apr p 34
Induction Heating: Key to Slab Casting System, Feb p 40
LD Blow-Interrupt Testing Aids In-Process Measurement, Oct p 35
LD Temperature Control, Apr p 45
New Advances in Electron Beam Melting, Mar p 34
New Approach to Batch Annealing Reduces Processing Time, Feb p 34
New Finnish Plate Mill, Apr p 43
New French Auto Scrap Plant, Mar p 31
New Tubemaking Technique Processes Continuously Cast Steel, Jan p 39
Novel Tube Finishing Process Improves Tolerances, Finish, Mar p 38
Preheating Scrap for BOF, July p 34
Pressure Casting Forms Tubes, Feb p 38
Pulverised Coal Injection Cuts Blast Furnace Coke Rate, Sept p 40
Quick, Safe Straightening, June p 31
Rolling Before Solidification Improves Continuous Casting, Aug p 44
Sidmar is Belgium's Newest Steel Plant, Jan p 34
Spiral Weld Pipe Plant, Sept p 41
Split-Furnace Annealing, May p 44
Steel, Aluminium Mills Adopt Coolant Filtration Systems, Mar p 42
Steelmakers Renew Interest in Prereduced Materials, Jan p 36
Steel Plants Being Rebuilt in Giant Steps, Jan p 27
Vacuum Becomes Part of Stainless Steelmaking, May p 42
Vibration Studies Reduce Costs, Oct p 41

Testing
Magnetic Bar Testing, Feb p 44
Metals Give Advance Notice of Their Intention to Fail, Aug p 32
Piezoelectric Crystals Power Portable Field X-Ray Units, Oct p 42

Ultrasonics
Ultrasound Used in Machining, Apr p 46

Welding
Aluminium—Steel Joints, June p 43
Automatic Seam Welding, Sept p 37
Critical Pipe Welding, Jan p 41
Edge Coating for Steel, Mar p 37
Fast Weld for Large Parts, Mar p 39
Gas-Jet Laser Cuts Metals, May p 39
Japanese Shipyards Explore One-Side Welding Methods, Feb p 32
New Hardfacing Technique Triples Production, Jan p 42
New Lap-Welding Process Makes High-Speed Seam Welds, June p 42
Plasma Needle Arc Welds Foil; Simplifies Complex Welding, June p 32
Shock Waves Weld Pipe, Apr p 35
Triple Arcs Weld Pipe, Aug p 33
Underwater Metal Fabrication: A Challenge to Metalworking, Aug p 36
Users Evaluate New Generation of Welding Processes, Sept p 27
Weld Fastening Oblong Studs, Sept p 31
